All America Glads

EMPEROR (Plant Patent No. 1655) (470) (Baerman-Fischer, 1958) (85 days) (Beauty's Blush X (Gloaming x Rose O'Day) A true aristocrat, this glad of regal purple trimmed in ermine presents a stately display. The spikes are majestic with 7-8 round, gracefully recurved rose-purple florets open at once in semi-formal placement. Each floret is embellished by a large, pure white throat; the characteristic which gives Emperor its noble perspective. The All America release for 1958, Emperor, incorporates the traits of its predecessors. It grows consistently tall and straight producing plants five feet or more in height with 20-22 bud flowerheads. Blooms about mid-season. Emperor has distinguished itself on the show table and in numerous trial gardens as a seedling. The coveted All America award was the culmination but not the end of its winnings, for Emperor possesses the qualities of a champion. It is sure to achieve many more honors at future shows all over the continent.

CARIBBEAN (Plant Patent No. 1654) (376) (Baerman-Fischer, 1957) (70 days) (Beauty's Blush x Better Times) The delicate blue tones of this exciting novelty present an unusual combination of rare blue-violet petals handsomely embellished by a rich, deep violet throat and a small cream spear. Caribbean opens from 9-11 precisely styled florets at one time in formal, double-row placement. It possesses a quality uncommon to many varieties and almost a rarity among "so-called blue glads", that of extreme vigor. In every way, Caribbean displays top performance. It consistently produces tall, well-proportioned spikes and unusually healthy bulbs. It is the first distinctly ruffled blue-violet gladiolus. Every flower lover will want this striking novelty in his garden. Its refreshing beauty will make it a sure-fire winner in its class at flower shows. Caribbean had a busy year at the shows last summer.

MAYTIME (Plant Patent No. 1591) (442) (Baerman-Fischer, 1957) (70 days) (Beauty's Blush x Friendship) A light-hearted charm surrounds this brightly colored glad. The gracefully ruffled deep, pure pink florets with their contrasty large white throats bring back the memory of the freshness of May-blooming flowers. Maytime is a lithesome glad of good height. It readily opens 8-10 florets on spikes five and one-half feet tall. A robust grower, Maytime has wonderful plant health and makes fine, plump bulbs. You will love Maytime for its long ribbon of color, for the silky taffeta sheen of its petals, and for its remarkable ease of growth. An ideal flower for either cutting or exhibition and a gem for the home garden.

APPLEBLOSSOM (Plant Patent No. 1517) (460) (Baerman-Fischer, 1956) (65 days) (Beauty's Blush x Rose Charm) This exquisitely tinted All America glad has won many friends and admirers. The predominating color is a clean, snowy white with a flush or corona of cool, rose-pink at the edges of the petals. Eight to ten trimly tailored florets, five inches in diameter, and of very heavy substance, are open at once on spikes up to five feet tall. A grand cutter. A vigorous, easy grower that performs well with only average culture.

ROYAL STEWART (Plant Patent No. 1339) (450) (Pommert, 1956) (75 days) (Red Charm x Seedling) Royal Stewart is the leading 1956 introduction according to the N.A.G.C. Symposium. Appleblossom was second. What a testimony for the All Americas! Royal Stewart led all other varieties in its class as an exhibition variety in this same poll. Royal Stewart consistently produces tall, straight spikes that open 8-10 recurved florets in formal, double-row placement. Color is clear, light red.

GREETINGS

In offering our thirteenth catalogue to you, we wish to thank all of our customers of years gone by for their patronage. We would appreciate having you speak a good word to your friends about our bulbs, and if you are not in need of bulbs, you might hand this catalog to that neighbor or friend. Our bulbs grew fairly well in 1957, and the bulblets made better bulbs than usual. We attended several shows, and won a few ribbons on our seedlings including an AMERICAN HOME ACHIEVEMENT AWARD, on three spikes of JUDI-LYNN. We tagged a large number of seedling groups for further testing, and discarded 110 that had been on test for three seasons. We succeeded in growing a fine large group of new seedling bulbs, and had good luck with a nice seed crop. We welcome visitors any time, and especially when the seedlings are in bloom. Better drop in about the first of August, and look them over with us. We tried out quite a number of new varieties, Party Ruffles being outstanding, as was also Li'l Abner, one of the finest "smalls" we have grown. Golden Sunshine, Rose Spire and Campanile made excellent spikes, too.

THAT SEEDLING PATCH!

The Spring and Summer of 1957, was one of the poorest growing seasons for Gladiolus we have ever experienced. The extreme heat came on with one downpour of rain after another; and many of our early plants died out. Those that survived made extra fine bloom, and our season did come out fairly well at the finish. We have about 160 older seedlings, many in rather large quantity that we will continue with in 1958. We discarded 111, mostly from our 1955 selections. Our old favorite, SUGAR ELL had a very good season, and supplied our up-town flower shop with thousands of bloom in the late season. This seedling will produce extra fine spikes from No. 5 bulbs, and exhibition spikes from threes and fours. However it blooms so late that we do not make any effort to get it into the shows. We dug almost thirty thousand bulbs of it this Fall. My son Bill says: Dad, let's sell some bulbs of this in January, 1959! Well, it is up to him.

We brought in a winner in the AMERICAN HOME ACHIEVEMENT AWARD contest in our show, with one we have named JUDI-LYNN, after a granddaughter. This glad is a very light pink, or blush pink; in 300-size, that seems able to hold 12 to 14 blooms open in good shape. It probably favors one of its parents, Phantom Beauty in that respect, altho the color is brighter and sharper. Its seed parent was a seedling of Magnolia X Strawberry Peach. We have about 800 bulbs and two quarts of bulblets ready to plant next Spring. Another seedling we named Kandy—after another granddaughter; and this glad is a real peppermint-stick color, with a beautiful orange blotch. It was Champion of the State Show at Spencer in 1956. The 300 bulbs we have seem healthy and good, so we might get a pretty fair start with it in 1958. It grows tall and straight.

We have a promising white glad, that has a faint pink feather, and one that almost makes the 500 class. It has one feature we like very much. After cutting and setting in a cool room over night it seems to have a definite GLOW or glisten that we seldom find in any other glad. It grows very strong and powerful spikes and seems to have excellent health. It captured the 3-spike Blue in our show.

GENERAL LIST

This is our thirteenth season to send out a catalog, and we have always tried to give a description of each variety, as well as price of the bulbs. We still grow several of the older varieties, because they are reliable and healthy. Red Charm and Elizabeth the Queen are still top quality in our garden and in our Flower Shop, and we are glad to offer them. All orders of \$3 or more will be prepaid; and terms are cash with order. Bulbs not sold in smaller quantities than those listed under each variety. 10 bulbs will be sent for the price of eight (single price), if any bulbs are unsatisfactory upon arrival, money will be refunded upon return of the bulbs.

THE NORTH AMERICAN GLADIOLUS COUNCIL

The Council was organized ten or twelve years ago, for the advancement of our favorite flower—Gladiolus. This writer has been a member from the start and has missed only one or two National Conventions during that period. Have held office of Trustee and Director of the council, and many times have tried to enlist new members. We will mail with this catalog, an application form you may wish to use to apply for membership. The Quarterly Bulletin published by the council is worth more than the membership fee. The Fee is \$2. In case you might wish to join the Iowa Glad Society, an additional \$1.50 will cover it. To anyone joining these two clubs, and forwarding an order for \$3 (minimum. of bulbs, we will include a dozen labeled "small" variety bulbs, including a bulb of the outstanding Li'l Abner. It pays to have membership in "THE COUNCIL".

LIST OF SEED CROSSES

For several seasons we have been making up a list of Seed-Crosses, from which we think we can spare some seeds for our friends and customers, and we are submitting the following list for your consideration. All crosses in list "A" will be 50c per 25 seeds. List "B" will be priced at 50c per 15 seeds. Limit—two packets of any cross to one customer. Please make a couple of selections as second choice, in case we run out of certain seeds. There is always a "run" on one or two crosses that we might offer. (We can also supply a fine mixture of seeds from a dozen or more crosses (spilled seeds) at 35c per hundred, and there should be some fine surprises in this offering.)
